

**Job Opportunity:** Field-based Stormwater Data Collector (Temporary, Ad Hoc)

**Organization:** The Stormwater Innovation Center

**Location:** Providence, RI (Field-based, Roger Williams Park or Olneyville vicinity)

**Position Type:** Temporary, Ad Hoc (Not to exceed 300 hours)

**Compensation:** \$20 per hour

**About Us:**

The [Stormwater Innovation Center](#) is an organization dedicated to improving stormwater management and water quality through monitoring, research, training and public outreach. We're seeking motivated individuals to join our team as a Field-based Stormwater Data Collector on a temporary, ad hoc basis. This role offers flexibility, the opportunity to work outdoors, and a chance to contribute to the understanding and preservation of our local environment.

**Responsibilities:**

- Collect accurate stormwater data and information in the field.
- Work outdoors in various weather conditions, including adverse weather.
- Utilize your own smartphone and internet access to record and transmit data.
- Demonstrate a basic understanding of computers for data recording and communication.
- Display a general interest in stormwater or environmental science (preferred but not required).
- Ensure timely and precise submission of collected data.
- Collaborate with our team to achieve project goals efficiently.

**Qualifications:**

- Ability to work independently and responsibly in a field-based setting.
- Basic understanding of weather patterns and weather radar.
- Access to a smartphone and reliable internet connectivity.
- Preferred: General interest in stormwater, environmental science, or related fields.
- Preferred: Reside or work near **Roger Williams Park** or **Olneyville neighborhoods** in Providence.
- Must have reliable transportation to get to field sites.

**Benefits:**

- Flexible work hours to accommodate your existing job or commitments.
- Competitive compensation at \$20 per hour.
- Opportunity to contribute to environmental data collection and preservation efforts.
- Gain hands-on experience in field data collection and environmental research.

**How to Apply:**

If you're excited to take on a flexible and dynamic role that allows you to contribute to environmental science while earning extra income, we encourage you to apply! **Please submit an email with a brief statement of interest, including any experience, with the subject line "Field-based Stormwater Data Collector Application."** Email Ryan Kopp @ rkopp@asri.org.
